

## Pumpkin Stencil

1. First, clean out your pumpkin.
2. Pin the template to your pumpkin.
3. Use another pin to punch holes around the edges of the black shapes.
4. Remove the template.
5. Use a knife to cut out the punched-out shapes on the pumpkin. Scrape away the top layer of skin on the grey areas to add some contrast.
6. When finished, pop a candle in the pumpkin and GET SPOOKY!
